ABOUT US

OVER **45** YEARS OF
EXPERIENCE

The Mission of 7G MARBLE, which derives its strength from its executives with up to 45 years of experience in the field of natural stone in prestigious projects in many countries of the world, is to achieve excellence in Health & Safety, Quality and Schedule in the field in which it operates. For this, it follows the latest developments in natural stone and gives the highest priority to the training of its employees in every field.

Natural Stone is one of the most important materials used both on the exterior and interior spaces of Prestige Buildings for centuries. Many branches of Engineering and Architecture (Geology, Construction, Machinery, Metallurgy, Computer, Architecture ..) are used in the stages that the Natural Stone has gone through, until it is taken out of the nature and assembled in its place in the building and delivered to the Employer.

New Engineering branches are being established in every field in the world day by day. "Stone Engineering" seems to be a new need for natural stone sector. The vision of 7G MARBLE is to establish the Faculty of Stone Engineering in the world.

OUR SERVICES

- Design + supply + installation of stone works as turnkey project either Lumpsum or remeasured base,
- **Consultancy for Facade Stone Cladding , interior and hardscaping stone works**
- Preparation of natural stone shop drawings and cutting (production) lists,
- **Design of fixing system for natural stone facade/wall cladding,**
- Preparation of production list of designed fixing system,
- **Design calculation and PE Approval of any type fixing systems,**
- Supply of fixing system (either designed by us or Others)
- **Supply of any stone material from any part of the World**
- Installation of stone works (cladding, flooring ,decorative..) at any place in the World
- **Quality Control during the production of material at the Factories as per the standards**

NATURAL STONE

Natural stone has been the first choice of architects and engineers in building construction throughout the history. Although very hard to produce, stone is always preferred due to its unique aesthetic and functional qualities that largely satisfy the necessities in building construction. Stone is a physically strong and durable material, and performs well under compressive forces.

- It has a much longer life span,
Requires very little maintenance other than cleaning.
- It provides a good insulation and ideal protection against climatic conditions.
(Due to its low heat transfer factor)

Hence it is regarded as an ideal building material for exteriors as well as interiors.

The most common types of stone are:

- Marble,
- Granite,
- Limestone.
- Onyx
- Travertine,
- Slate and
- Basalt

You can find natural stones in any color you can imagine. The variety of color and texture of the natural stone is unlimited.

The very common finishes are;

- Polished, Honed, Bush hammered and sandblasted for Marble,
- Polished, Honed, Flamed, and sandblasted for Granite

ANCHORS & APPLICATIONS

Engineered fixing systems for precise and secure stone installations.

7G Marble designs and manufactures anchoring solutions for façades, cladding systems, and architectural stone elements. Each system is developed for reliability, durability, and seamless integration with natural stone applications.

From standard anchors to custom-engineered solutions, our systems are built to perform on site, in any condition, for every project.
